TransformEdge Application Management Services are designed to drive efficiencies through portfolio rationalization, improving maintainability, and process automation. TransformEdge aims to provide its clients with improved business value, quantify the expected returns, and accelerate results

TransformEdge deploys a Portfolio Business Assessment Methodology to identify and prioritize areas for process improvement and define a roadmap to align the overall enterprise portfolio with the business requirements.

TransformEdge, directly and together with its partner network, provides the ability to flexibly scale the delivery capabilities associated with technology and functional resources to provide the necessary agility in managing the application platform for evolving business needs.

01

TranformEdge has DBA expertise with a wide diversity of industries including finance, superannuation, eCommerce, Recruitment (and many more) towards delivering a superior quality of support services to our clients.

02

We're passionate about the work we do and take genuine pride and full responsibility for the SQL Servers that are in our care and under our management.

03

Take comfort in the knowledge that our in-house systems are continually monitoring your SQL servers, and automatically triage events to ensure that priority support matters are automatically escalated to our 24*7*365 On-call DBAs, while non-critical events are ticketed and queued for actioning next business day to save your business money.

04

We have information resources, analytical tools, and most important, certified database experts, who can help you understand and evaluate the full range of database administration options so that you can build a strong database administration and technology strategy.

1 For those buyers who order via email, cut the manual keying and automate with Cloud Trade Intelligent Ordering, delivering straight-through no-touch order processing.

2 It captures the order details from the email attachments and the email body text with 100% accuracy and validates the data, like a human, by cross-checking against the stock, product numbers, and check, before augmenting the data

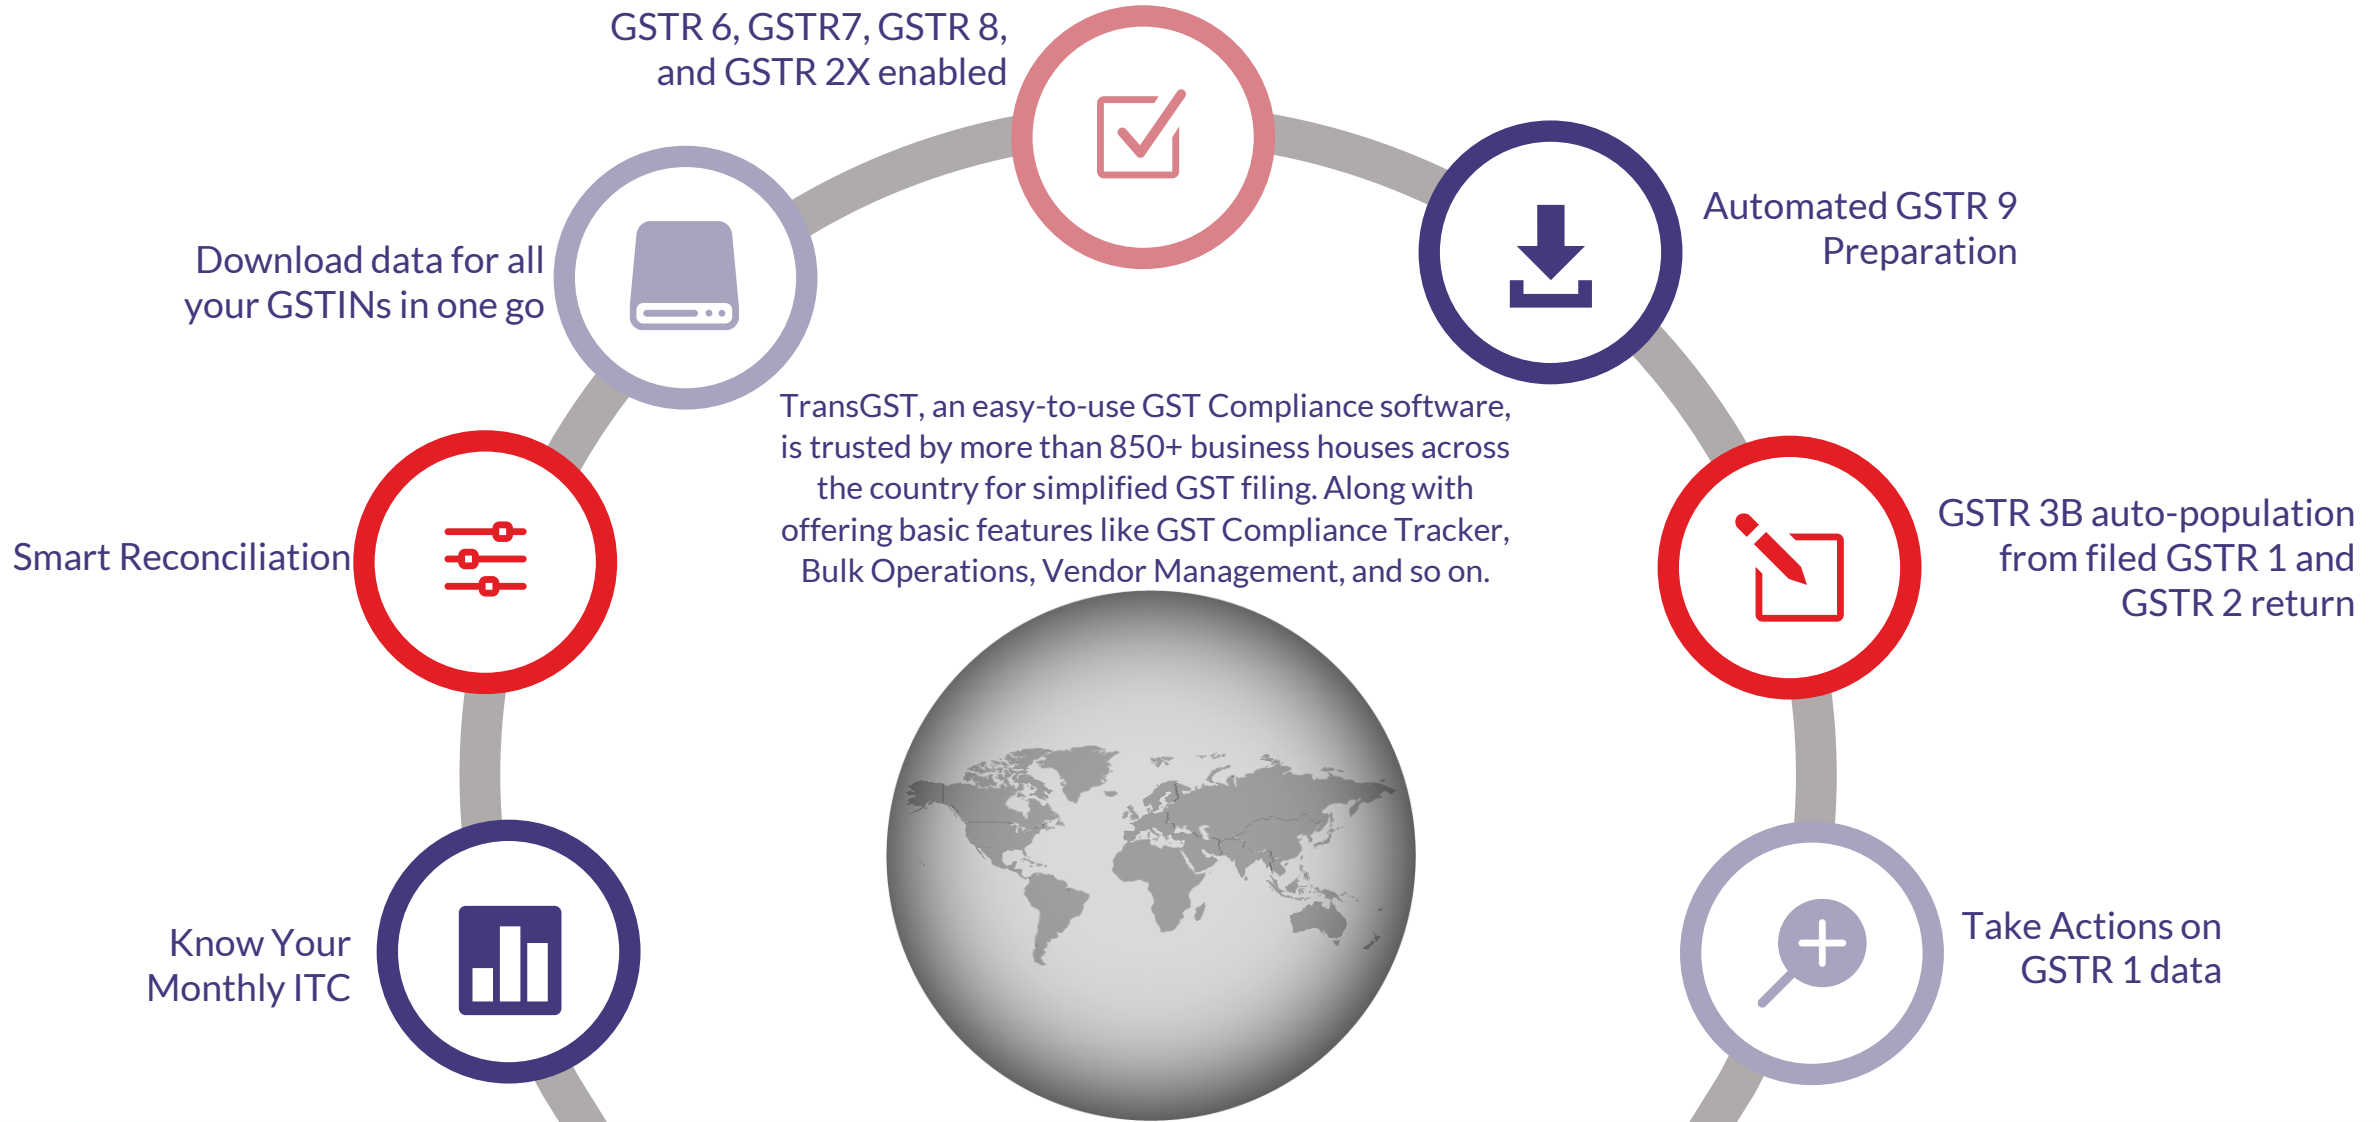

3 As orders are submitted 24/7 and in real-time, the speed of processing is vastly increased, processing more orders in a shorter time and offering a greater number of customers next-day fulfillment, bringing better service and improved customer satisfaction.

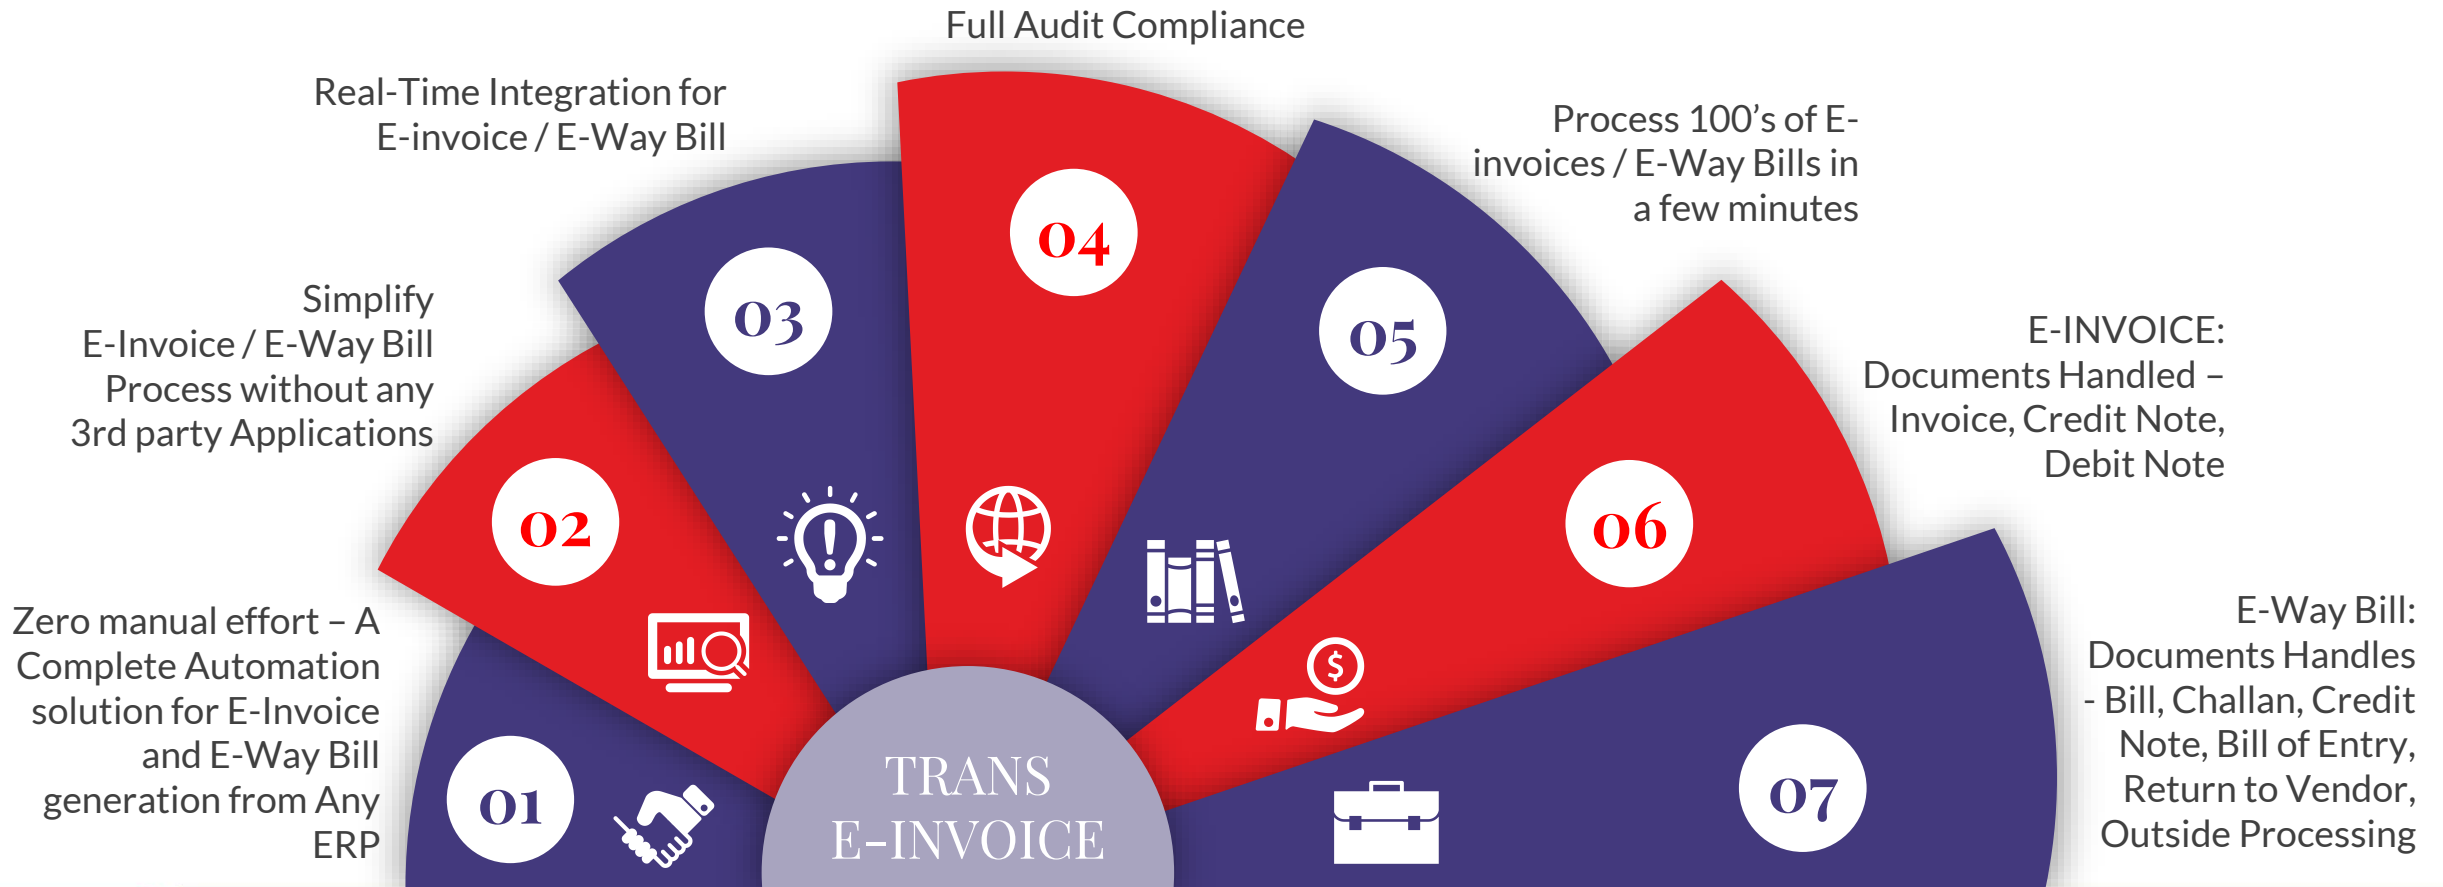

4 "TransformEdge has made a big difference to our business, it makes processing quick and accurate."

“India’s Best e-Invoicing Software to Simplify Your GST e-Invoicing”

TransE-Invoice ERP is an e-Invoicing compliant software explicitly designed to adapt to new GST requirements. e-Invoicing is mandatory for businesses with a turnover of above ₹ 20 Crores w.e.f. 1st April 2022.
